Kaspa is in the PoW Blockchain sector. Kaspa is a proof-of-work (PoW) cryptocurrency that implements the GHOSTDAG protocol. Unlike traditional blockchains, GHOSTDAG does not orphan blocks created in parallel; rather, it allows them to coexist and orders them in consensus. The Kaspa blockchain is a blockDAG. Based on the last 2 years' risk/return profile, this asset is considered Less Risky. Ticker symbol: KAS.

We found 2 months to be the optimal trade horizon, after testing several possible alternatives (accuracy of previous returns). Otherwise, consider closing out this trade once the target level of 0.23 (+70.7%) has been reached. Based on Kaspa's recent up and down swings, 10x Research suggests considering setting a stop loss level for this insight at 0.122489 (last price at 0.132393), which is equivalent to a -7.5% decline.

Recommended Position Size: 13.4% or (\$13k, per 100k Portfolio), as Vol of KAS-USD is high (54%).
